

Back-End Developer Roadmap

Learn Basic Front-End Dev

You must know basics of front-end development, and how things work in the browser.

HTML

CSS

JavaScript

Once you know basic front-end, you can then jump right into learning a programming language, there are so many options of programming language that you can learn to become a backend developer.

Note: You don't need to know multiple programming languages to become a backend developer.

Choose a Programming language

JavaScript

Python

PHP

Ruby

Rust

Java

Go Lang

Then choose a Framework according to your programming language

 JavaScript

JavaScript Runtime

 Node.js

 Deno

Node.js Popular Framework

ex

Express.js

Nest.js

Fastify

Sails

Hapi

Restify

koa

Koa

Python Popular Framework

Django

Flask

PHP Popular Framework

Laravel

Symfony

Ruby

Popular Framework

Rails

Sinatra

Java

Popular Framework

Spring

Google Web Toolkit
